Business Intelligence Consultant

Are you looking to join a highly ambitious and fast-growing company that will help you develop professionally?

We are looking for an extraordinary individual to join the team.

FortyOne Business Solutions is a fast-growing company that believes in simplification and empowerment. We strive to achieve this by designing top data analysis solutions and business process automation using leading technologies and platforms.

Our vision is to become the most impactful analytics and system integration provider in Southern Africa, particularly for distribution and manufacturing industries.

In order for us to achieve this goal, we need to build a formidable team – and this is where you come in.

Your primary focus will be on delivering Business Intelligence solutions to clients on their premises. You will spend your time at client sites, developing a thorough understanding of their businesses and implementing systems and processes to improve their operations. The role centres on Qlik (Sense/View) implementations, dashboard development, data modelling, integrations, and analytics solutions, with additional exposure to process automation where relevant.

This is a hands-on consultant position requiring strong SQL/Data querying background and a few years of relevant BI experience. You will engage directly with senior executives, deliver value daily, and build skills across industries that open career paths such as data/business analyst, BI consultant, implementation specialist, and integration expert.

You will need to be driven, self-motivated, and results-oriented to succeed in this client-facing, on-site environment. This is a highly challenging, high growth opportunity – results are always rewarded.

This position is ideal for candidates with:

- Hands-on experience building end-to-end data solutions that turn business questions into usable analytics outputs
- Strong SQL skills, including CTEs, window functions, complex joins, and dynamic queries.
- Experience with at least one BI/analytics platform (Qlik, Power BI, or similar)
- Relevant qualifications such as BEng Industrial Engineering, Bachelors in Data Science, BEng Data Engineering, BCom Mathematical Sciences (Data Science), or equivalent practical experience demonstrating strong analytical and data skills.
- Ability to engage directly with stakeholders and understand business problems.

Please forward your CV and personal cover letter to marius@fortyone.co.za. Visit www.fortyone.co.za for more information about us.

OVERVIEW

Recruiter: Forty One Business Solutions (PTY) Ltd
Availability: 1 Month
Remuneration: R30 000 to R40 000 per month
Language: Fluent English
Nationality: South African Citizen or Valid Work Permit
Logistics: Office-based in Cape Town, Montague Gardens

ABOUT US

Forty One Business Solutions is a fast-growing company that believes in simplification and empowerment. We strive to achieve this by designing top data analysis solutions and business automation using leading technologies and platforms

REQUIREMENTS

Experience and Competencies:

- Strong analytical and problem-solving skills, communication, flexibility
- 2+ years hands-on data analysis and advanced SQL work including CTEs, window functions, complex joins, temp tables, dynamic queries, and ETL processes.
- Proven experience turning business requirements into data models, transformations, and dashboards/dynamic reports.
- Familiarity with BI tech such as Qlik or Power BI.
- 1+ years in a client-facing or consulting capacity delivering data/analytics solutions (not pure back-office reporting)
- Experience diagnosing issues, designing efficient approaches, and building solutions that scale without constant rework

DESCRIPTION

Responsibilities:

- **Client Happiness**
- Design, develop, test, implement, and document data solutions.
- Prepare and present demonstrations and proofs-of-concept.
- Highly motivated and self-reliant.
- Business and process analysis – translate business needs into technical specifications
- Ensure data accuracy and perform data recons.
- Automate and add efficiency to processes.
- Identify opportunities to add value and solutions.

Typical Work Day:

- Analyze, connect/process data via SQL Queries, program scripts
- Problem solve and design processes, specifically data modeling and dashboards, data pipelines
- Collaborate on client challenges around data and IT business processes
- Implement and manage projects from start to finish

PROGRESSION

Possibility of holding the following roles:

- Implementation Manager
- Snr Business Intelligence Consultant
- Account Manager
- Team/Department Lead
